DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhee U.S. Patent Number 6,289,054 in view of Clark U.S. Patent Number 7,058,048.

Re Claims 1, 6, Rhee teaches in fig. 4, a encoder 406 encoding video input (media object) for transmission over lossy network to the Receiver 402, whereby 402 includes Statistics Gathering/Reporter 412 monitors communication parameters and reports it to the Adapter 414 for modifying a quantization level (base layer & enhancement layer) and rate shaping for 406 (See col. 5, lines 36 +; also see col. 15, lines 30-39). Rhee fails to explicitly teach the neural network for adapting the parameters. However, Clark teaches QoS monitoring for multimedia communication system whereby a neural network based algorithm is used to learn from the observed network impairments and to predict the continuous behavior of the packet connection. One skilled in the art would have been motivated by Clark to modify 412 to include the learning and prediction of the neural network to maintain QoS of the multimedia data. Therefore, it would have been obvious to one ordinary skilled to combine the references.

Art Unit: 2616

Re Claims 2, 7, refer to Claim 1, wherein the communication parameter includes A-D.

Re Claims 3, 8, refer to Claim 1, supports RTCP.

Re Claims 4, 9, refer to Claim 1, supports MPEG.

Re Claims 5, 10, refer to Claim 1, video.
